For Detailed Information

Event Information

The conference aims to bring faculties, instructors, organizations, scientists, experts, students, and private sector representatives to share and discuss information and studies in a theoretical and practical framework. In addition to presentations, the conference aims to expand the network of attendees.

The theme for the 2025 conference is Artificial Intelligence. Special sessions will be held on the applications of AI in education, sustainability, healthcare, and robotics.

Sessions

The conference encourages submissions that showcase original and high-quality research contributions in areas but not limited to:

- S1. Cybersecurity**
- S2. Metaverse**
- S3. Artificial Intelligence**
- S4. Software Engineering**
